

Ricardo Rossiter Barioni

PERSONAL DETAILS

<i>Birth</i>	April 22, 1996
<i>Phone</i>	55-81-985582677
<i>Mail</i>	rrbarioni@gmail.com
<i>Linkedin</i>	linkedin.com/in/rrbarioni
<i>Github</i>	github.com/rrbarioni

EDUCATION

M.Sc. in Computer Science <i>Federal University of Pernambuco (UFPE), Recife, Brazil</i>	Aug 2018 - Jul 2020
B.Sc. in Computer Science <i>Federal University of Pernambuco (UFPE), Recife, Brazil</i>	Apr 2014 - Jul 2018

PUBLICATIONS

HuTrain: a Framework for Fast Creation of Real Human Pose Datasets <i>Poster (accepted for publication) at 2020 21st International Symposium on Mixed and Augmented Reality (ISMAR)</i>	Jul 2020
Songverse: a music-loop authoring tool based on Virtual Reality <i>Extended Paper (accepted for publication) at 2020 11st Journal on Interactive Systems (JIS)</i>	Jul 2020
Usability and effects of text, image and audio feedback on exercise correction during augmented reality based motor rehabilitation <i>Elsevier Computer & Graphics (C&G) Special Issue at 2019 21th Symposium on Virtual and Augmented Reality (SVR)</i>	Sep 2019
BalletVR: a Virtual Reality System for Ballet Arm Positions Training <i>Full paper at 2019 21th Symposium on Virtual and Augmented Reality (SVR)</i>	Aug 2019
Songverse: a music-loop authoring tool based on Virtual Reality <i>Full paper at 2019 21th Symposium on Virtual and Augmented Reality (SVR)</i>	Aug 2019
Human Pose Tracking from RGB Inputs	Aug 2018

Full paper at 2018 20th Symposium on Virtual and Augmented Reality (SVR)

ARkanoidAR 2.0: Otimizações em uma solução de realidade aumentada com base em testes de usabilidade
Poster at 2018 26th Congresso Brasileiro de Engenharia Biomédica (CBEB)

Aug 2018

ARkanoidAR: an Augmented Reality System to Guide Biomechanical Movements at Sagittal Plane

Jun 2017

Full paper at 2017 19th Symposium on Virtual and Augmented Reality (SVR)

EXPERIENCE

Academic Research

Jan 2018 - Aug 2020

Voxar Labs, Recife, BR

Academic researches focused in natural interaction and machine learning.

Technique enhancement of human pose estimation methods from RGB inputs.

Academic Research

Mar 2019 - Aug 2020

CIn Projeto Samsung, Recife, BR

Enhancement of user experience on extended realities, in collaboration with Voxar Labs.

Academic Research

Jul 2017 - Mar 2019

CIn Projeto Samsung, Recife, BR

Enhancement of computer vision's state of art methods, in collaboration with Voxar Labs.

Undergraduate Research

Aug 2016 - Nov 2017

Voxar Labs, Recife, BR

Academic researches focused in natural interaction and augmented reality.

Technique enhancement of therapeutic exercise orientations on augmented reality applications using biomechanical gestures recognition and functional gestures recognition methods exploration.

Undergraduate Research

May 2017 - Jun 2017

Voxar Labs, Recife, BR

Academic researches focused in data visualization.

Development of a web tool for analyzing bat populations from thermal images obtained on caves.

PROJECTS

BalletVR

2019

This system is a virtual reality application for guiding ballet dancers through learning and practicing basic ballet arm positions. By using a Microsoft Kinect for tracking the dancer's performed poses, the system compares them with basic arm positions, proposed by École Française, and allows the dancer to practice autonomously.

Onboarding Visualization

2018

This tool was built with the purpose of helping open-source maintainers to measure the effectiveness of their onboarding process, and give helpful tips on how to improve it.

Musical Invaders

2018

Based on the original 1978 arcade shooting game called Space Invaders, it is a web game where the player controls a spaceship, whose objective is to prevent aliens to reach earth by shooting musical notes. Not only fun, but Musical Invaders also encourages players to be creative by improvising new melodies while playing.

BatVis

2017

This project is a web application for visualizing bats tracking data obtained from thermal images in caves. This application is able to provide insights, such as changes in bats populations and flight behavior, in a more intuitive fashion, which can be used to the biomonitoring of population tendencies, habitat use and the effects of climate change.

ARkanoidAR

2017

This project is an augmented reality system that guides physiotherapy patients through the rehabilitation process of biomechanical movements at the sagittal plane. The system uses Microsoft Kinect for tracking the user's poses and instructs the user which movements must be performed by providing a series of visual and auditory feedback.

LEADERSHIP AND AWARDS

Reviewer at Symposium on Virtual and Augmented Reality 2020 (SVR)

Aug 2020

Brazil

Publication at Congresso Brasileiro de Engenharia Biomédica 2018 (CBEB)

Oct 2018

Hotel Atlântico Búzios, Búzios, Brazil

Participation and Presentation at Symposium on Virtual and Augmented Reality 2017 (SVR)

Nov 2017

PUCPR, Curitiba, Brazil

Volunteer at Olimpíada Brasileira de Robótica 2017 (OBR)

Aug 2017

Arena Pernambuco, São Lourenço da Mata, Brazil

Teacher Assistant of Programming Language Paradigms

Aug 2016 - Mar 2017

Federal University of Pernambuco (UFPE), Recife, Brazil

Participation at International Free Software Forum 2017 (FISL)

Jul 2016

PUCRS Center of Events, Porto Alegre, Brazil

Teacher Assistant of Algorithms and Data Structures
Federal University of Pernambuco (UFPE), Recife, Brazil

Mar 2015 - Mar 2016

Awarded B in First Certificate in English (FCE)
University of Cambridge, United Kingdom

Jan 2013

SKILLS

<i>Languages</i>	Portuguese (native), English (advanced)
<i>Software</i>	Python, OpenCV, PyTorch, Keras, C++, Git
<i>Interests</i>	Machine Learning, Computer Vision, Augmented Reality, Natural Interaction, Data Visualization
